

SAVE EARTH TO SAVE LIVES

By Suhaina Kareem and Mysha Nizam

GOAL:

Life on land, our photo matches to number 15

Rubbish that has been discarded in a community garden. There are socks, tablets, plastic bags and paper. It makes the local community look uncared for. It is also unsafe for humans, animals and flora. People are becoming lazy and are not concerned with protecting their local environment. This Links to goal number 15 which is life on land. We should have more rubbish bins so it would encourage people to recycle. This is becoming a community problem, people ignore the rubbish and it becomes acceptable. We are damaging our environment for the future.
