

The filthy truth

Photograph taken by: Mominah Zakira Ali from year 8 girls al-Madinah school

Location: BP gas station on Cavendish Dr. Auckland

In the photo there is a lot of rubbish and plastic waste, due to us littering which causes our environment to diminish. When we throw garbage on the ground the wind tends to lift it up and it can land in large bodies of water which causes marine pollution and harms our marine life. It disgusts me to see that this is happening to our environment when we should be nurturing it. My photograph is related to the fifteenth SDG which is life on Land and it means to protect, restore and promote sustainable use of terrestrial ecosystems.
